Telecom	5.51
Media	5.02
Real Estate	4.93
Chemicals	4.92
Pharmaceuticals	4.92
Power	4.91
Capital Goods	4.88
Services	4.58
Others	4.58

14 sectors contribution in nifty
From time to time this writable changes marginally so do not be confused if various sources show different results.

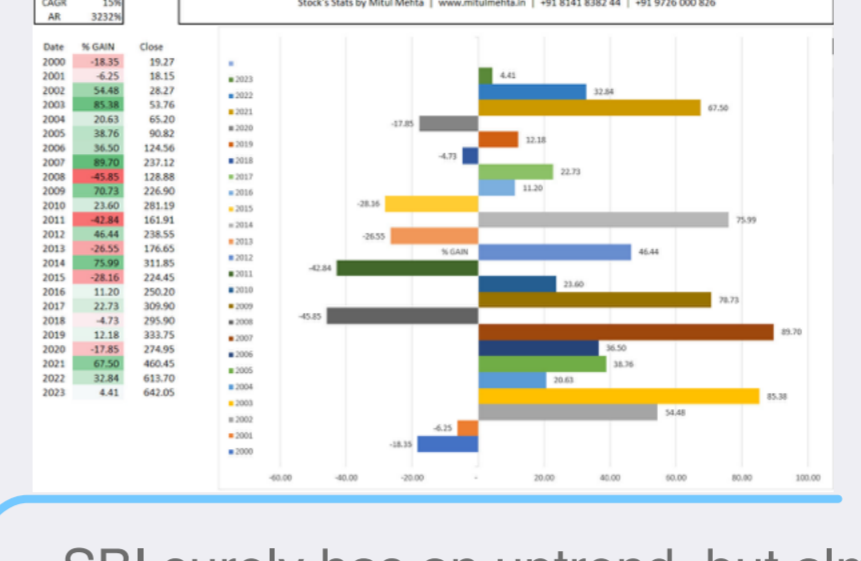

Understand the Banking Sector Weight

Sector divided in 2 branches

- Private - Leader - HDFCbank
- PSU - Leader - SBIN

This is a YOY% chart, we at ARIHANT mCube 3.0 spend most of the time in DATA analysis, not chart analysis.

SBI surely has an uptrend, but almost every 3rd breakout is followed by a 50% retracement. This kind of information we derive when we do DATA analysis.

What numbers says

Quarterly Results	Dec2020	Dec2023
HDFCbank	Net Profit @ 11,813 crores	Net Profit @ 21,243 crores
SBIN	Net Profit @ 6,614 crores	Net Profit @ 11,598 crores

My strategy

- HDFCbank
 - Buy 60% at support
 - Buy 40% at BO
- SBIN
 - Buy 40% at support
 - Buy 60% at BO

If you are not confident about level plotted in Daily time frame then increase the time frame to Weekly

When stocks are unclear with their trend they generally BO fail, and this happens most in non-growth stocks.

Watch @ <https://youtu.be/XKbDdkja4E>

All breakout has resulted into great trend continuation in weekly time frame.

With this we can say that more or less breakouts are reliable in this stock and time frame.
