- Consolidation is your enemy
- You cannot miss any trade
- You cannot change stock

Use manual analysis after market closed to plot range & avoid trading in this range.

When stock is selected, then all trade must be executed.

- PIDILITE
- SBIN
- M&M
- Above stock for analysis only, we do not claim any profit probability.

- Conditionals
 - Always wait for closing of candle
 - Do not trade at crossover

Always execute trade at open of next candle.
This strategy requires patience

- Partial exit
 - Only if trading in multiple lots
 - Keep 1st target at 5% AR or bet. 20,000 - 25,000 profit per lot.

- No trade =
 - Price is above 93 in daily & below 39 in hourly
 - Price is below 93 in daily & above 39 in hourly

- Sell =
 - When in daily price is below or cross 93 SMA
 - Exit = When price close above 39 MA of hourly time frame.

- BUY =
 - When in daily price is above or cross 93 SMA
 - Exit = When price close below 39 MA of hourly time frame.

- Tools used
 - Simple moving average
 - Value = 39
 - Time frame = Hourly
 - For Entry and Exit
 - Simple moving average
 - Value = 93
 - Time frame = Daily
 - For Trend identification

- Any trades has only 1 out of this outcome
 - Big profit
 - Big loss
 - Small profit
 - Small loss

- Vision for this strategy
 - Always to remain in trade where profit in big or top 10% profitable trades from bottom to top.
 - Small profitable trades is also required to recover losses.
 - Accuracy should not be expected above 65%
